## Quality Assurance Test Analyst

### Description

Backed by substantial investor funding, dopay are recruiting the best and brightest to continue building our world-class team. Within the technology group, dopay are hiring developers, DevOps specialists, product owners, product designers and testers. Every individual will contribute their unique skills to a powerhouse team that's committed to shaping and delivering their successful future.

### Responsibilities

Your Responsibilities as a dopay Quality Assurance Test Analyst are:

- As a key member of the Product Team, you will take ownership of all the testing activities related to either changes in current functionality or brand-new products.
- Design, implement and execute the most adequate testing strategies at all levels of testing (System, Integration and Regression)
- Work closely with Product and other stakeholders preparing detailed acceptance criteria & scenarios at early stages of Product Requirements, which will later be used by the technical team during the implementation of the features.
- Co-ordinate UAT with business stakeholders and consider user satisfaction as a metric of system quality.
- Embed each of the testing activities into the Release Cycle, providing QA sign-off for every release into Production.
- Reporting and documenting test execution, the quality of tested deliverables and adherence to the agreed standards.
- Collaborate with development and product team to clarify expected system behaviour and ensure high quality environmental changes.
- Participate in the Product Scrum Team ceremonies, such as daily stand-ups, retrospectives, and planning sessions.

### Qualifications

- Bachelor's degree or equivalent experience
- 2+ years of hands-on experience in testing with regards to test planning, test designing and execution.
- Experience in Front-End testing and/or App testing is recommended.
- Familiarity with an agile environment and scrum organisation (experience with JIRA and TestRail will be a plus).
- Excellent communication skills, both written and verbal, with the ability to effectively collaborate within a team setting.
- Strong analytical and problem-solving skills with a particular attention to detail.
- You are a driven individual with excellent self-initiative and organisational skills. Willing to take ownership of the testing function at dopay.
- You have strong, well-informed opinions but are open to being convinced otherwise through thoughtful discussion with teammates. Strong opinions weakly held.
